

LIFT-U[®]

Accessor Convertible Walkway

Universal Access For The Interior And Exterior Of Buildings

ACW7

Installs flush with upper landing.

Serves as a single step entry for ambulatory use.

Provides ADA compliant slope making a single-step rise accessible.

LIFT-U's Accessor Convertible Walkway provides a unique solution to barrier removal, where existing conditions do not have enough space to construct an ADA compliant, stationary ramp.

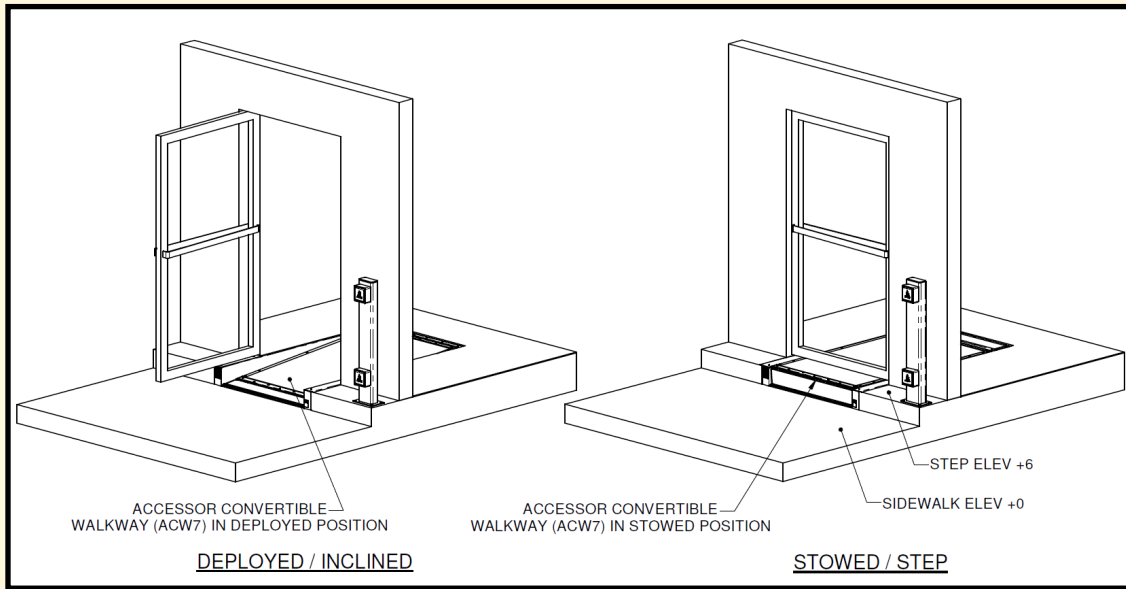

Accessor Convertible Walkway

PATENT INFORMATION REFER TO:
www.lift-u.com/patents.pdf

“A unique solution when following the 2010 ADA Standards is not readily achievable”

- ▶ Accessibility function is virtually invisible when not in use
- ▶ Efficient use of available space inside or outside the building
- ▶ All electric, no hydraulics
- ▶ Use for barrier removal in Existing Applications and Retrofits

General Features

Platform parks in the horizontal position until needed.
 Unit size is determined by the application.
 Vertical travel ranges available from 4 to 7 inches.
 Counterbalanced for power-drive efficiency

Slope

Standard slope is 1:12 unless the application dictates otherwise (i.e., space constraints).

Construction

Stainless steel construction.
 Powder-coated finish on all exposed surfaces.
 1,000 pound capacity.

Safety

Microprocessor monitors all safety points.
 Passenger Sensor prevents operation when occupied.
 Manual Operation in the event of power failure.

Power and Controls

Independent operation.
 Main power 115 VAC, 15A, 3-wire, single-phase.
 24 VDC controls.

Warranty

All parts are covered for one year from the date of completion.
 Extended warranty is available.

Code Compliance

Unique product, no existing governing code.
 Local Building Inspection may be required.

Optional Accessories Available

Remote, wireless control.
 Wall mounted call button.
 Audible Alarm.
 Can work in cooperation with an automatic door operator.
