FOLD OUT PLUS (LU11)

U.S. patents: 6,602,041; 7,533,432; 7,533,433; 7,533,434; 7,681,272
Additional U.S. patents pending Canadian patent 2,630,568

For ease of maintenance the rising floor can be removed without the use of tools making all components easily accessible from above.

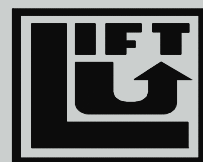

Product Specifications

- **950 pound rated capacity.**
- Ramp Platform is available in either 30-inch or 32-inch wide models.
- Tensioned controlled to prevent “free falling” of ramp platform in any direction.
- Object detection feature included. Should the ramp encounter an obstruction, the drive motor is disabled and ramp motion stops. Simply release the operator switch to automatically reset functionality.
- “Rising Floor” offered for easier passenger to bus transition. No depressed pockets to negotiate.
- Self contained module. Can be changed out in less than 30 minutes.
- **All major ramp components including the ramp plate are manufactured out of stainless steel for corrosion resistance. Aluminum is not used to avoid galvanic corrosion.**
- Manual operation requires less than 20 pounds of force to articulate ramp in any direction.
- Ramp is electronically operated and controlled. No hydraulics are required.
- Watertight electronic control enclosure.
- The LU11 ramp incorporates soft-touchdown technology. The ramp decelerates prior to contact with the sidewalk or roadway.
- Ramp has completed a 2,000 hour salt spray test per ASTM B117, after which the ramp operated without the need of repair or lubrication.
- Warranty: 2 years parts and labor allowance.
