

LIFT-U, DIVISION OF HOGAN MFG., INC

LIFT-U REMANUFACTURING PROGRAM

Is it time to consider the MDBF (Mean Distance Between Failure) of your wheelchair lift program? Mid Life Remanufacturing can reduce overall maintenance cost, increase reliability, and extend the life of your equipment. A look now could save paying more later.

Lift-U offers a Mid Life Remanufacturing program that can supplement your preventive maintenance program and extend the life of your equipment. Work is performed at our Production Facility following the same quality assurance program as new equipment. Matter of fact, each re-manufactured lift assembly comes with a one-year **"New Lift"** Warranty same as our new equipment. Optional Extended Limited Warranty is also offered.

The process includes transportation to and from your facility, disassembly, part inspection, new powder coating, final assembly and testing. All wear items will be replaced 100 percent. Parts that meet factory specifications will be recoated and reused. Parts that do not meet factory specifications will be replaced at no additional charge. Depending on your Lift Model all applicable upgrades and enhancements are included in the remanufactured price.
